Department of Computer Science and Engineering

Rajiv Gandhi University of Knowledge Technologies – Basar

Nirmal (Dist), Telangana - 504107

Summary

Features

1 Authentication System

1. User-friendly login and logout functionality.
2. Registration system for new users with form validation.

2 Product Listing and Categories

1. Displays products categorized into sections such as crops, fertilizers, hardware, and vegetables.
2. Enables easy navigation and browsing of product listings.

3 Shpping Cart

1. Interactive shopping cart feature.
2. Allows users to add, update, or remove items in real time.
3. Provides visual feedback for cart changes.

4 User Profile Test Cases

1. Profile management page for viewing and updating user details.
2. Displays user-specific information such as past orders or account settings.

5 Product Upload and Edit Test Cases

1. Interface for sellers/admins to upload new products.
2. Features for editing existing product details directly from the interface.

6 Responsive Design

1. Ensures a seamless user experience across devices (mobile, tablet, desktop).
2. CSS-based styling to adapt layouts for different screen sizes.

7 Custom Card Component Test Cases

- 1.Reusable MyCard component for displaying product information or any UI cards.
- 2.Enhances the visual design and consistency across the application.

Backend Features

8 User Management

- 1.Handles user registration, login, and logout.
- 2.Provides profile management functionalities.
- 3.Manages user authentication and session handling.

9 Product Management

- 1.Maintains a database of products with CRUD (Create, Read, Update, Delete) operations.
- 2.Allows uploading product details, such as name, price, and category.
- 3.Supports updating and deleting existing product information.

10 Cart Management

- 1.Facilitates adding, viewing, and removing items in the shopping cart.
- 2.Calculates total quantities and prices dynamically.

11 Payement

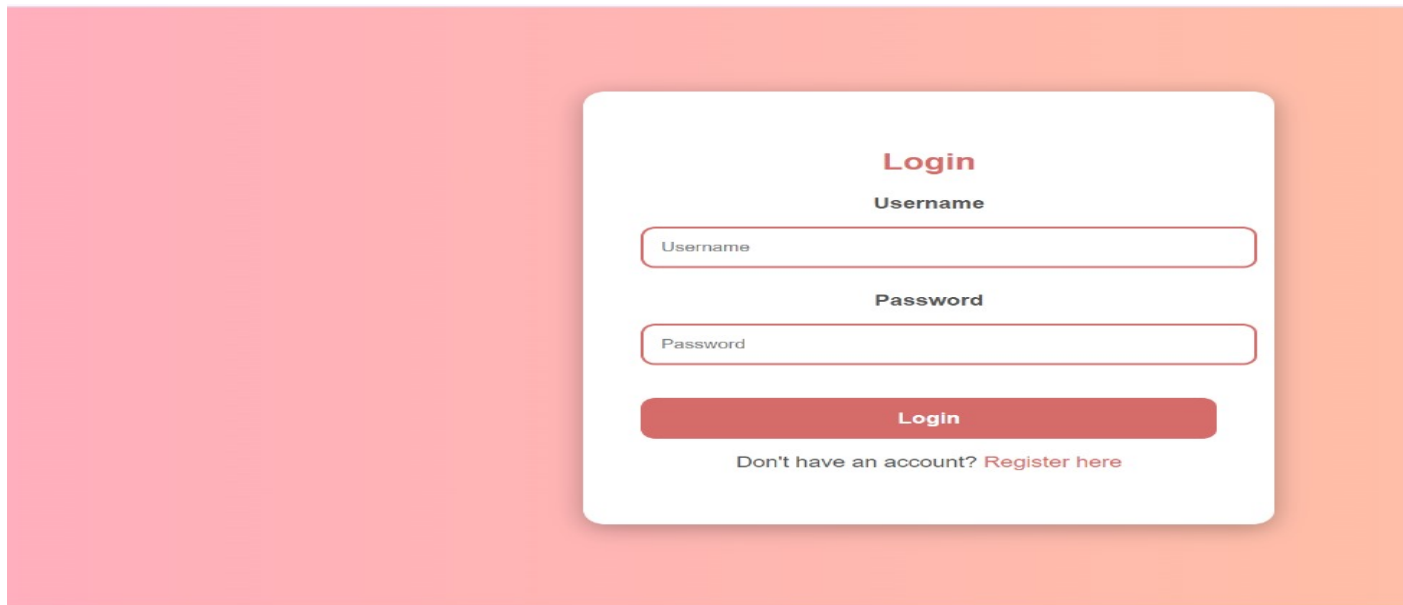

1. Select a payment method (e.g., Credit Card, PayPal, Cash on Delivery)
2. Click "Pay Now". The payment is processed, and the user receives a confirmation of payment.

Frontend Features

Authentication System

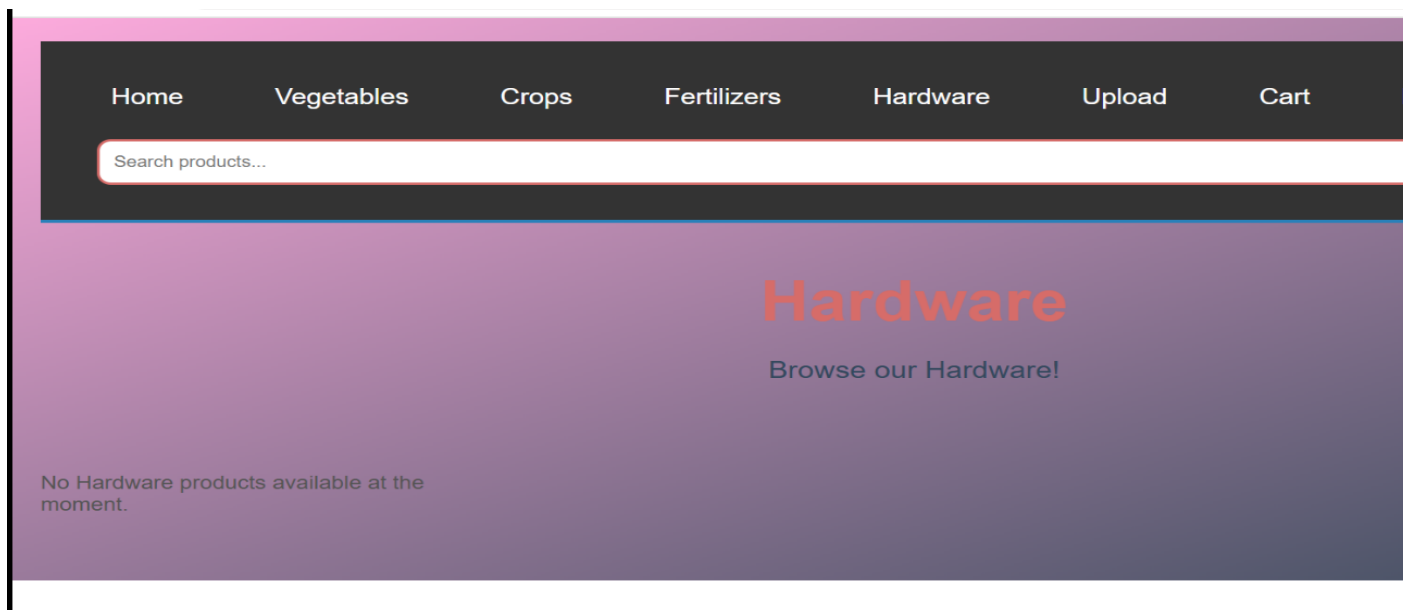

ID	Title	Steps	Expected Result
----	-------	-------	-----------------

F001	User Login	1. Open the login page. 2. Enter valid credentials. 3. Click "Login".	The user is logged in and redirected to the home page.
F002	User Logout	1. Navigate to the logout page. 2. Click "Logout".	The user session ends, and the login page is displayed.

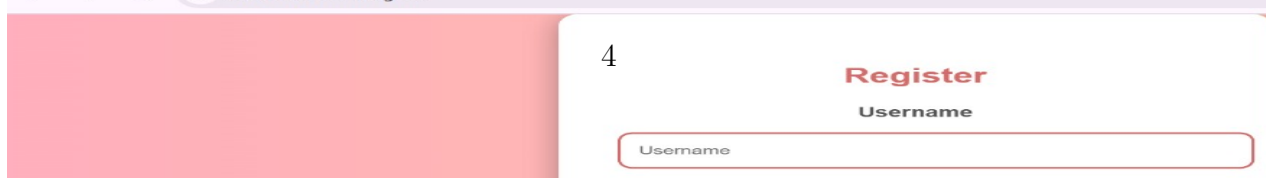

Product Listing and Categories

ID	Title	Steps	Expected Result
F003	View Product Categories	1. Navigate to the home page. 2. Click on a category (e.g., "Crops").	Products under the selected category are displayed.
F004	Search for Products	1. Use the search bar on the home page. 2. Enter a query. 3. Press "Search".	Relevant products matching the query are displayed.

User Profile Test Cases

ID	Title	Steps	Expected Result
UP001	View User Profile	1. Log in with valid credentials. 2. Navigate to the "Profile" page from the dashboard.	The profile page is displayed with user details like name, email, and contact information.
UP002	Update User Details	1. Navigate to the "Profile" page. 2. Click "Edit Profile". 3. Modify fields (e.g., name, email). 4. Click "Save".	Updated details are saved, and the profile page displays the updated information.
UP003	Validate Mandatory Fields	1. Navigate to the "Profile" page. 2. Leave required fields (e.g., name, email) blank. 3. Click "Save".	An error message appears: "This field required."
UP004	Upload Profile Picture	1. Navigate to the "Profile" page. 2. Click "Upload Profile Picture". 3. Select a valid image file. 4. Click "Upload".	The profile picture is updated, and the new image is displayed on the profile page.
UP005	Invalid Profile Picture Format	1. Navigate to the "Profile" page. 2. Click "Upload Profile Picture". 3. Select an invalid file type (e.g., .txt). 4. Click "Upload".	An error message appears: "Invalid file format. Please upload an image file (e.g., .jpg, .png)."
UP006	Reset User Information	1. Navigate to the "Profile" page. 2. Make changes to profile fields. 3. Click "Reset" instead of "Save".	All changes are discarded, and the fields revert to their original values.

Product Upload and Edit Test Cases

ID	Title	Steps	Expected Result
PU001	Upload a New Product	1. Log in as admin. 2. Navigate to the "Upload Product" page. 3. Fill in required fields (e.g., name, price, category). 4. Click "Upload".	The product is successfully added to the database and displayed in the product list.
PU002	Validate Mandatory Fields	1. Navigate to the "Upload Product" page. 2. Leave required fields (e.g., name, price) blank. 3. Click "Upload".	An error message appears: "This field required."
PU003	Invalid Product Price	1. Navigate to the "Upload Product" page. 2. Enter an invalid value (e.g., negative number) in the "Price" field. 3. Click "Upload".	An error message appears: "Invalid price. Please enter a valid positive number."
PU004	Edit Existing Product	1. Log in as admin. 2. Navigate to the "Product List" page. 3. Click "Edit" on an existing product. 4. Modify fields. 5. Click "Save".	The updated product details are saved, and the product list reflects the changes.
PU005	Validate Duplicate Products	1. Navigate to the "Upload Product" page. 2. Enter details of an existing product (e.g., same name and category). 3. Click "Upload".	An error message appears: "Duplicate product entry is not allowed."
PU006	Delete Uploaded Product	1. Log in as admin. 2. Navigate to the "Product List" page. 3. Click "Delete" on a product. 4. Confirm the deletion.	The product is removed from the database, and it no longer appears in the product list.
PU007	Upload Product with Image	1. Navigate to the "Upload Product" page. 2. Fill in required fields. 3. Select a valid image file. 4. Click "Upload".	The product is added with the image displayed correctly in the product list.
PU008	Invalid Image Format	1. Navigate to the "Upload Product" page. 2. Fill in required fields. 3. Select an invalid image format (e.g., .txt). 4. Click "Upload".	An error message appears: "Invalid file format. Please upload a valid image file (e.g., .jpg, .png)."
